### TECHNICAL SKILLS

JavaScript | NodeJS | ReactJS | ExpressJS | MongoDB | Git | HTML5 | CSS | Bootstrap | TailwindCSS

### WORK EXPERIENCE

Solitaire Infosys Inc | INTERN

- Collaborated with the team to design user-friendly interfaces and optimize website performance.
- Gained hands-on experience in debugging, testing, and improving code for better efficiency.
- Contributed to real-world projects, strengthening practical knowledge of front-end development and teamwork.

### PROJECTS

- Built a **Recipe Finder website using HTML, CSS, and JavaScript**, enabling users to search and view recipes with a clean, responsive design.
- Built a **Currency Converter application in React** with real-time API integration, enabling users to convert between multiple currencies through an interactive and responsive interface.
- Developed a **News App in React using API** integration to fetch and display real-time news articles with category-based filtering and a responsive user interface.
- Created a **Text Editor in React** with features like real-time text formatting, word count, and responsive design for an efficient user experience.
- Built a **Background Changer application in React** allowing users to dynamically switch themes
- “Developed a **Password Generator in React** with customizable options (length, numbers, symbols) to create secure and random passwords through an interactive interface.”

### ACADEMIC AND EXTRACURRICULAR ACHIEVEMENTS

Completed a 6-month Computer Diploma from Punjab Computer Center (ISO Certified) with a typing speed of 40 WPM, demonstrating attention to detail and continuous improvement.
